JAISURYA S

CAREER SUMMARY

IT graduate focusing on backend development and software engineering. Proficient in Python programming with experience developing RESTful APIs using Flask. Strong skills in SQL for database integration and automation scripting. Familiar with agile SDLC practices and version control with Git/GitHub.

EDUCATIONAL QUALIFICATION

BISHOP HEBER COLLEGE

Bachelor of Computer Application (2022 to 2025) with CGPA of 7.25

GOVERNMENT HIGHER. SEC. SCHOOL

Passed 10th Std. with 77.2% in 2019 and 12th Std. with 77.0% in 2022.

TECHNICAL SKILL

- ✓ **Programming Languages:** Python, Java, SQL.
- ✓ **Web Frameworks & Tools:** Flask (web development), Postman (API testing), n8n (workflow automation).
- ✓ **Databases:** SQL (relational databases).
- ✓ **Version Control:** Git, GitHub
- ✓ **Concepts:** RESTful API development, web application architecture, SDLC, basic understanding of AI/ML.

SOFT SKILLS

- **Soft Skills:** Communication, Team Collaboration, Problem Solving, Adaptability, Critical thinking.

CERTIFICATIONS

- Fundamentals of **Java Programming** – Greens Technologys
- Web Development and cloud service(Provided by **VALUE ADDED COURSE IN BISHOP HEBER COLLEGE**)
- Introduction to Artificial Intelligence(Provided by **LINKEDIN**)
- Certificate of Accomplishment **SQL(Intermediate)** – HackerRank

WORK/INTERNSHIP EXPERIENCE

Intern – Aerix Nova AI Solution (*April 2025 – June 2025*)

- Worked on AI-driven backend APIs using Python & Flask, including data validation and testing..

Software Associate – Samcore Technologies(*November 2025 –July 2026*)

- Contributed to custom software and ML projects, supporting backend development and data processing using Python & Flask.

Graduate Trainee – Tata Consultancy Services (TCS)
(**Aug 2025 – Present**)

- Supporting and maintaining enterprise software systems, assisting with issue resolution, testing, and day-to-day operational upkeep.

PROJECTS INVOLVED

- **LLM Data Validation and Integration:** Validated LLM data and APIs for the Tenken application to ensure accuracy, integrity, and reliable system performance.
- **Automated Workflow and Sentiment Pipeline:** Developed n8n automation workflows to perform sentiment analysis and auto-update reports, improving operational efficiency.
- **ResNet-Based Multi-Detection System:** Developed a deep learning application using ResNet to detect currency, objects, and known/unknown faces, with real-time audio output for detected classes, integrating model inference with Python-based application logic.

KNOWLEDGE ACQUISITION EVENTS

- Participated in the 3rd International Conference on “Intelligent Computing System” (ICICS) 2025.
